MOORESTOWN
Small Fruit ^{AND} Plant Farm

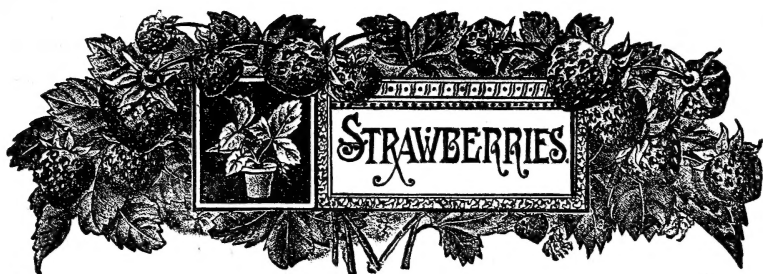

S. C. DeCOU,

Moorestown, Burlington County, New Jersey.

WM. J. LOVELL, NURSERYMEN'S PRINTER AND BOOKBINDER,
MOORESTOWN, BURLINGTON CO., N. J.

The new strawberry, Felton, that I am introducing this year, is considered the best of Oscar Felton's many good seedlings, among which are the Cinderella, Continental and Legal Tender strawberries, Early Prolific and Reliance raspberries.

The Felton is a seedling of the Sharpless, a strong, healthy grower, berry dark glossy color, large size and of excellent quality. It compares with the Sharpless, but is a stronger grower, more productive than the Sharpless generally is, and free from decay around the stem, retaining a green hull.

All things considered, it is the most profitable large berry of which I know, selling readily in Philadelphia at twenty to twenty-five cents per quart when other varieties were bringing from six to ten.

"My seedling strawberry, Felton, that I now offer through the agency of S. C. DeCou, is a strong, healthy grower, abundant bearer, of large size, solid, good quality and very productive. It is of a bright red color, has a green hull, strong stem and healthy foliage, free from rust. The plant produces an unusual number of large berries, holding their size well through the season. One berry measured $7\frac{1}{2}$ by $7\frac{3}{4}$ inches. It surpasses in size all other berries that I have fruited. Its firm texture renders it particularly desirable for long shipments as well as for home market. The fruit brought in market last year from twenty to thirty-five cents per quart. Staminate or perfect blossom."

OSCAR FELTON,
Merchantville, N. J.

"I examined the Felton strawberry carefully the past summer; found it an unusually large berry, handsome, firm and of good quality, promising to be placed in the front rank as a market berry as well as furnishing a variety that brings exceptionally good prices under high culture.

CLAYTON LIPPINCOTT,
President Moorestown National Bank.

PRICES OF FELTON.

\$1.50 Per 10. \$5.50 Per 50. \$10 Per 100.
\$40 Per 500. \$75 Per 1000.

One-third off to the trade when plants are advertised in catalogue.

BUBACH'S No. 5; a strong, healthy grower and heavy yielder of large berries. As it is pistilate it will require planting near a staminate variety.

LIDA did nicely, a very productive pistillate berry, of large size, solid, prolific and handsome.

ONTARIO; a fine berry from Canada, large, handsome and productive.

WONDERFUL is not a new variety, but has never failed to yield abundantly so far as I have tried it. It is very similar to Windsor Chief, except that it is a larger plant and stronger grower; dark red berry and very productive; one of the best late varieties.

This fruit flourishes best on dry land of a loose texture and medium fertility. Plant in rows six to seven feet apart and three to four feet in the rows.

ERIE.—About the size of the Wilson Early, and entirely hardy.

WILSON, JR.—A seedling of the old Wilson Early, as large as the mother berry in its youngest days, and very productive. There may be localities where the size and hardiness must be sacrificed to productiveness, but for this locality and further south Wilson, Jr., is an excellent variety.

GRAPES.

The flavor of the grape is universally enjoyed both by young and old, and it is considered especially healthful. It is easily grown, can often occupy a small plot of ground not available for trees. It is a pity that so many who have ground to cultivate should be deprived of this great luxury.

Pyle's Red Winter, Red Bietigheimer, Wolf River, Alexander and Salome at 20c. each and \$15 per 100; Dickinson, top worked, 20c. each.

DELAWARE WINTER.—Originated at Milford, Del., and is said to be a very important addition to late keepers. Has been kept in good condition until August with ordinary care. Fruit medium to large, bright red, good quality; two year trees, 18c. each; \$15 per 100.

PRINCESS LOUISE APPLE.

"The skin is smooth and free from all blemishes and has a very bright, waxy lustre, as though it had been highly polished. The color is a clear, bright carmine on a transparent yellow ground. No description will convey any adequate idea of the extreme beauty of this fruit, which is so striking that it would

command attention in any market from its attractive appearance—but to this rare beauty of appearance it adds excellence of quality—the flesh is pure white like that of a Snow Apple, tender, juicy and nearly as melting, with a richer flavor and higher aroma, indeed one of the most fragrant of apples. Mr. Wolverton considered it to possess all the qualities of the Snow Apple, besides being more beautiful and a better keeper.” Two year trees, 40c. each.

PEACHES.

They are usually planted from 15 to 18 feet apart each way.

So far as I can learn the “yellows” occur from a lack of proper fertilizing elements in the soil, and not from any special disease. An application of potash, ground bone, or some other good fertilizer, often restores the trees to health and vigor.

First size, 8c. each ; \$6 per 100 , \$50 per 1000.

Second size, \$4 per 100 ; \$30 per 1000.

TESTIMONIALS.

Waynesboro, Pa.

MR. S. C. DeCOU :

The trees came to hand to-day in good order, and good trees. Thanks.

Eatontown, N. J.

DEAR SIR :

Peach trees received in prime condition ; please accept my best thanks for promptness and liberality in filling orders.

Greenup, Ky.

FRIEND S. C. DeCOU :

Received the strawberry plants in good order, and more of them than we could expect. I got them on the 6th and set them out on the 8th, and they look well. I think every one will grow.

Watsonville, Cal.

DEAR SIR :

The Cinderella strawberry plants sent me last month arrived in excellent condition and are now growing finely. A few plants have berries on them, which I find to be true Cinderella. The great difficulty with most of the plants I get from the East is that they are terribly mixed.

Mifflintown, Pa.

DEAR SIR :

Trees and plants arrived promptly and in fine condition, and the best packed I ever saw. Accept thanks for promptness.

Elmont, L. I., N. Y.

DEAR SIR:

The strawberry plants you sent were very fine, as also the June budded peaches.

New Egypt, N. J.

DEAR SIR:

The plants come to hand all right and in good order. Am much pleased with them.

Greensburg, Ind.

We received plants all O. K. to-day. Were well pleased with them.

Chadd's Ford.

SIR:

Strawberry plants sent by you received in good order. I like your stock; the only fault I have to find is there is too much of it—you get too much for the money.

Stevensville, Mich.

DEAR SIR:

The strawberry plants came to hand in fine order, much pleased. Many thanks,

FOR PURE NORTHERN
